

**The Cook and Boardman Group** is dedicated to enhancing safety and security in the facilities and communities we serve. We concentrate on providing a comprehensive solution that adds value through meticulous coordination and collaboration tailored to our customers' specific needs. With our proficiency in code compliance, life safety requirements, and technological solutions, we are the perfect partner to assist in navigating the complexities of your building and addressing its challenges.

Everyday wear and tear can render a fire door non-compliant. This is why we provide a find and fix repair during an inspection. We do full-service repairs of doors, frames, provide door hardware repair and replacement. We also provide the replacement fire door and frame.

## COMPREHENSIVE INSPECTIONS OF EVERY FIRE DOOR

We provide ongoing maintenance, on-site diagnostic services and access to all the materials you need to keep your facility operational. Our experts help you with the design and budget of additions or upgrades on any scale, as well as ensure your facility complies with any new code regulations.

## COMPLIANT FIRE DOOR DOCUMENTATION

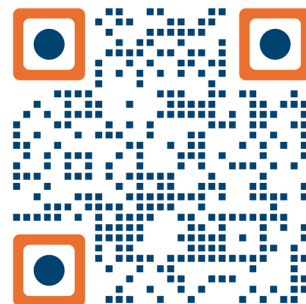

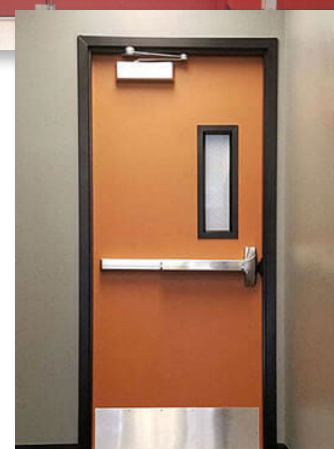

Once repairs are made we provide a detailed report that expresses the compliant status of the door. The report also indicates the location, the name of the door, and the details of the steps you took to get your facility back into compliance.

Every door compliant, safe and you as the business owner are able to negotiate on insurance rates and ensure the safety of employees and customers.
