

PRE-INSTALLATION SERVICES

Reduce Labor. Speed Up Installs. Minimize Job-Site Chaos.

General Contractors know that door and hardware installation can be a time-consuming, labor-intensive headache. Cook & Boardman simplifies the process with pre-installed doors and hardware so your crews can focus on keeping projects on time and within budget.

With strategically located pre-installation facilities, we use patent-pending technology to deliver doors ready to hang. This reduces on-site labor, material handling, and last-minute coordination headaches.

How We Keep Your Job Site Running Smoothly

- **Accurate material ordering** to avoid costly delays and rework
- **Pre-site prep and field inspections** to ensure openings are ready for install
- **Organized and tagged materials** so there is no sorting through pallets of hardware
- **Pre-installed hardware** to reduce labor needed on-site
- **Bench-tested electronic hardware** to avoid troubleshooting in the field
- **Shrink-wrapped and staged for install** so deployment is faster and more efficient

What It Means for Your Bottom Line

- Lower labor costs by minimizing hours spent on door hardware installs
- Accelerated project timelines with fewer punch lists and delays
- Less job-site waste and damage by reducing misplaced or broken parts
- More predictable scheduling because doors arrive fully prepped for installation
- Fewer RFIs and surprises since we catch issues before they hit the field

Doors That Arrive Ready to Hang or Fully Installed by Our Team

Whether you need pre-installed doors delivered to your job site or want our experienced installers to handle the entire process, we are here to help. Let's build smarter, faster, and with fewer headaches.
